

J-1450 Electric Jet

The J-1450 has the same drain cleaning power as our popular J-1600, but it's more compact. You can take this jet into some really tight spaces. And if you want to put it into a car trunk, you can take off the reel in seconds and load the machine in two pieces. Overall height is 32", and when you remove the 200 ft. capacity reel, the height drops to 14-1/2".

The telescoping handle on the J-1450 makes it easy to roll the machine to and from the job, and then slides out of your way when you're on the job. A low center of gravity keeps the J-1450 solidly in place while you work.

The J-1450 is powered by a 1-1/2 hp (13 amp) sealed motor with an in-line ground fault circuit interrupter. The dual capacitor motor is totally enclosed, so water won't harm it or pose a shock hazard.

A 1500 psi, 1.7 gallon per minute triplex pump is equipped with Vibra-pulse® to work the hose around tight bends in small lines. This unique feature allows the flow rate to remain the same whether Vibra-pulse® is on or off. Safety features include a thermal relief valve to protect the pump from heat damage, as well as a backflow check valve and inlet filter.

Compact!
Portable!
Powerful!

J-1450 Specifications:

Pump:

Triplex w/Vibra-pulse®

Pressure:

1500 psi

Flow:

1.7 gpm

Motor:

1-1/2 hp 13 amp w/GFCI

Reel Capacity:

200 ft. x 3/8" hose

Weight:

105 lbs. (48 kg)

Dimensions:

27" L x 17-1/2" W x 29" H

(14" H w/o Reel)

(69 cm x 45 cm x 74 cm)

The hose reel detaches in seconds, so it fits easily into small spaces like car trunks.

A convenient slide-out handle makes this machine really portable.
