

Gen-Eye POD™

Pipe Inspection/Location System

Just grab it and go

The lightweight, Gen-Eye POD™, MINI-POD™, and X-POD™ combine camera, reel, and monitor in an all-in-one package.

You get a large 7" LCD color monitor protected by a padded case. It's mounted on a rugged yet flexible gooseneck that swivels to give you the best viewing angle, wherever you're working.

The full size Gen-Eye POD™ features a self-leveling camera and 200 ft. of Gel-Rod® for troubleshooting 3" to 10" drain lines. The big capacity MINI-POD™ carries 125 ft. or 175 ft. of push-rod and color mini-camera for inspecting 2" to 4" drain lines. The X-POD™ combines the compact frame of the Gen-Eye MINI-POD™ with the standard size Gel-Rod and self-leveling color camera to create a lightweight package for inspecting 3" to 10" lines up to 100 ft. long. The tough steel frame can be operated vertically or horizontally, so you can handle nearly any application.

There's lots more, like a picture inverter, both AC and DC power cords, LED Dimmer Control, 3" Trap Skid, and a 512 Hz transmitter (optional with MINI-POD). A video out connection lets you record on an external device.

Gen-Eye X-POD
